

The Smart Speaker For Your Simulator

Turn any manikin into a lifelike,
conversational patient.

Key Capabilities

- Works with any simulator or task trainer
- Tracks performance supporting program-level insights
- Access a broad, multi-specialty scenario library
- Customize patient scenarios in minutes
- Power lifelike dialogue with **AI/Speech™**, the healthcare-specific LLM
- **AI/Assessment™** delivers automated scoring and instant feedback

Now available with TouchStation to roll in an AI-driven virtual patient into your center!

The fastest-growing communication training tool in healthcare simulation.

SimVox Lite, Pro, and Ultra provide tiered choices that let programs select the capabilities that fit their needs and budget.
