

Spark for NCLEX

Virtual simulation resource for NCLEX preparation.

Work through realistic clinical scenarios with AI-driven patients who respond to what you say and do, so you can practice clinical judgment the way the exam tests it.

■ **Nine Patients. Eight Client Needs Categories. One Capstone.** One patient for each NCLEX competency — Management of Care, Safety & Infection Prevention and Control, Health Promotion & Maintenance, Psychosocial Integrity, Basic Care & Comfort, Pharmacological & Parenteral Therapies, Reduction of Risk Potential, Physiological Adaptation — plus a ninth, capstone case that folds all eight together into one high-acuity scenario.

■ **Packaged as digital, interactive material** for NCLEX preparation, scenarios run in a browser — any laptop or tablet, or a Meta Quest headset for students who already own one — no lab required.

■ **Easy on faculty.** Complete scenarios already built — nothing to create, nothing to configure. Send a class roster and every student's access is ready.

■ **Priced differently, too.** Purchased once, not licensed like a subscription.

How Spark Aligns with the NCLEX

Measures clinical judgment, not memorization. Each case works through diagnostics and diagnoses, nursing actions, and complications – the same decision-making the exam tests.

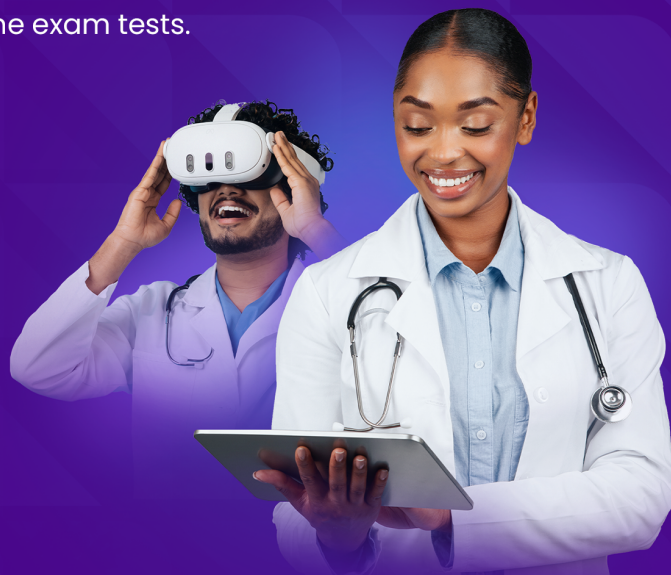

Closes the theory–practice gap:

Realistic, evolving patient cases let students apply classroom knowledge to clinical dynamics in a safe environment as many times as it takes.

Builds prioritization under pressure.

Students triage urgent findings against routine ones and document their reasoning the way the exam, and the bedside, expects.

The result: students who don't just recognize content, but **think like nurses**.

Pricing

\$ 99.99 / student

-  Sold in blocks of 100 access codes | \$9,999
-  Codes never expire. Programs can purchase codes anytime and assign them to students when needed.
-  Your program owns this complete resource outright. It's priced like a textbook, and you choose whether to give it to learners or charge for it.
-  No annual subscription. No renewal cycle. No use-it-or-lose-it codes.

**Add simulation to students' preparation
for exam–day confidence.**
